

CBP Job Hazard Analysis (JHA) & PPE Assessment	Job Title: Exposure to Coronavirus "COVID-19"		Date: 16 April 2020 FINAL	New	Revised X
	Title: All CBP Personnel in Affected Areas	Supervisor: All	Prepared By: HRM, Occupational Safety and Health (OSH) Division CBP Senior Medical Advisor		
Offices: All CBP	Locations: CBP Wide	Departments: All	Reviewed By: Office of Field Operations, USBP, AMO, and Operations Support		
Required or Recommended Personal Protective Equipment: surgical masks, nitrile gloves, N95 respirators, protective outer garments, gowns, shoe coverings, face shield or non-vented goggles			Approved by: OSH Division Director CBP Senior Medical Advisor		

Note: This JHA only applies to the 2019 Novel Coronavirus (SARS-CoV-2) or the disease known as "COVID-19." The Centers for Disease Control and Prevention (CDC), Occupational Safety and Health Administration (OSHA), World Health Organization (WHO), and other public health agencies are now categorizing the outbreak of COVID-19 that has spread to countries around the globe, including here in the United States, as a global pandemic. While the general risk to CBP personnel and the public for serious harm from COVID-19 is still considered LOW at this point, risk of exposure does vary by geographic location, age, underlying health risk factors, and the nature of work being performed. It is CRITICAL that all personnel take standard precautions recommended in this JHA, along with other credible public health entities. The information, used to develop this JHA, along with additional informative links can be found on the [CBP Safety and Health COVID-19 Resource Page](#) on CBPnet. For the purposes of CBP guidance and protocol, this JHA should be considered CBP policy, and should be implemented accordingly.

Risk Assessment: Incomplete information regarding incubation, infectious period, and transmissibility, as well as evolving circumstances make a definitive risk assessment challenging. In light of this, awareness and operationally-informed precautions are warranted. The overall risk to CBP personnel is still assessed to be low for serious harm from COVID-19. However, risk increases with increased exposure to persons potentially infected with COVID-19, warranting enhanced precautions described herein. CBP personnel should continue to maintain situational awareness regarding this outbreak. Of note, with the growing incidence of COVID-19 in the United States, there is less of an exposure risk distinction between high risk foreign travelers and US residents; CBP employees need to be vigilant regarding workplace, home, and potential off-duty exposure.

While COVID-19 is a respiratory disease, the use of N95 respirators is one component in preventing the transmission of COVID-19. Other PPE may be needed under certain conditions and in some work environments as outlined in this JHA. The use of N95 respirators and masks is NOT the most effective or primary way of preventing disease transmission. All personnel should take these basic steps to prevent exposure to and transmitting COVID-19: (1) Practice good hygiene; (2) Washing hands frequently; (3) Covering your cough or sneeze; (4) Stay away from work if you are ill and contact your health provider for guidance; (5) Avoiding unnecessary congregate settings where COVID-19 exposure is more probable; (6) Follow CDC and Agency guidance for the use of "face coverings"; and (7) avoid touching your face.. Follow state/local/national social-distancing guidance off-duty and at home. The use of N95 respirators should be limited to front line personnel and those high risk work situations. See "Notes" Page for more information.

Note: Risk categories (Very High, High, Medium, and Low) are used in conjunction with this document. These categories refer to the mission-specific risk relative to the hazard identified. Risk categories do not correlate to the overall risk of contracting COVID-19 disease. Additionally, these risk categories are not the same as those used by other agencies such as the CDC, etc.

Operations	Risk Categories	Hazards	Protective Measures/PPE Guidance
1. HQ Offices, CBP Facilities, Office Settings, Mission Support, and other Administrative Settings	Low	<p>Casual or Close Contact of Coronavirus cases is not expected.</p> <p>Signs and Symptoms of COVID-19 include:</p> <ul style="list-style-type: none"> • Fever • Cough • Difficulty breathing • Other Flu-like Symptoms <p>Note: While most COVID-19 lab confirmed cases do display these type symptoms, SOME persons may only display mild symptoms and they may appear at different stages of the disease.</p>	<ul style="list-style-type: none"> • Stay up to date on latest information from DHS, CBP, CDC, WHO, and other COVID-19 alerts, advisories and updates. See more information on page 9. • Use the following disease prevention practices in ALL activities. • Frequent hand washing. • Stay home if you are ill and contact your health provider right away if you notice any signs or symptoms similar to COVID-19. • If you think you have been exposed to someone with COVID-19, notify your supervisor and your health provider. • KEEP YOUR HANDS BELOW YOUR CHIN and avoid touching mouth, nose, and eyes. • Cover your cough/sneeze with a tissue or cuff of your elbow, NOT your hands. • Use of N95 respirators is NOT recommended. • Voluntary use of surgical masks may be approved by supervisors, supplies permitting, and should be in accordance with CBP voluntary use policies. • Surgical masks may also be permitted to meet CDC recommendations for the use of "face coverings" in public or congregate settings. See "Notes" page and CDC guidance on "face coverings" in congregate settings. • Medical Clearance and Fit Testing are NOT required for voluntary use. • All use of N95 respirators should be reserved for front line personnel performing work for which they were intended, in accordance with OSHA 1910.134, and CBP OSH 5200-08B policies.
2. Port of Entry Operations Primary Passenger Processing	Medium	<p>Casual Contact (Greater than 6 ft.) with passengers or persons with increased risk of COVID-19;</p> <ul style="list-style-type: none"> • Persons with potential COVID-19 Symptoms, or • Who may have a travel nexus to a high risk country within the past 14 days, or • Otherwise high risk for or suspected COVID-19 <p>This section is intended for the processing and handling of persons during primary who are higher risk, but not symptomatic.</p>	<ul style="list-style-type: none"> • Stay up to date on latest information from DHS, CBP, CDC, WHO, and other COVID-19 alerts, advisories and updates. See more information on page 9. • Use general disease prevention outlined in Section 1. • Use CBP Guidance for Leadership, Medical Officers, and Supervisors to determine if exposure should be entered in the <u>CBP COVID-19 Incident Tracker</u>. • Passive observation of persons for signs of illness. • Use COVID-19 R.I.N.G. Card and general precautions. • Separate persons with symptoms of illness or a high risk country/travel nexus, and send to secondary for additional processing and CDC consultation. • Avoid close or direct contact with passengers having a travel nexus to a high risk country within the past 14 days or suspected of having COVID-19. • Wear disposable nitrile gloves. • Provide surgical masks to any persons with signs of illness. • Voluntary use of N95 respirators by front line personnel may be considered with supervisor approval per CBP policy. (See HB 5200-08B, Ch.26).

3. Port of Entry Operations	High	Limited Close Contact Within six (6) feet of a person with travel nexus to high-risk country within 14 days or with signs/symptoms of illness.	<ul style="list-style-type: none"> Stay up to date on latest information from DHS, CBP, CDC, WHO, and other COVID-19 alerts, advisories and updates. See more information on page 9. Use general disease prevention outlined in Section 1. Quickly identify and separate symptomatic passengers from others. Use <u>CBP Guidance for Leadership, Medical Officers, and Supervisors</u> to determine if exposure should be entered in the <u>CBP COVID-19 Incident Tracker</u>.
Note: This includes limited periods of closer (<6 feet) contact with a person at increased risk of having COVID-19 during the secondary phases of screening, and also includes holding, transportation operations where limited close contact would apply.	Very High	Extended Close Contact or Direct Contact	<ul style="list-style-type: none"> Passive observation of persons for signs of illness. Avoid direct contact and keep close contact to a minimum. Use COVID-19 R.I.N.G. Card for general precautions. Refer/escort any persons with travel nexus to high risk country within 14 days or suspected of having COVID-19 to CDC for consultation. Contact EMS for severely ill passengers or persons suspected of having COVID-19 (high fever, uncontrollable coughing, difficulty breathing, etc.). Provide surgical masks to symptomatic persons/travelers. Wear disposable nitrile gloves. Officer wear N95 respirator within six (6) feet of symptomatic passenger. Wear goggles or face shield to protect eyes.
4. Port of Entry Operations	Very High	Extended Close Contact or Direct Contact	<ul style="list-style-type: none"> Stay up to date on latest information from DHS, CBP, CDC, WHO, and other COVID-19 alerts, advisories and updates. See more information on page 9. Use general disease prevention outlined in Section 1. Quickly identify and separate symptomatic passengers from others. Use <u>CBP Guidance for Leadership, Medical Officers, and Supervisors</u> to determine if exposure should be entered in the <u>CBP COVID-19 Incident Tracker</u>. Avoid direct contact and keep close contact to a minimum. Avoid direct contact and keep close contact to a minimum. Limit time in room to critical functions. Use COVID-19 R.I.N.G. Card for general precautions. Refer/escort any persons with travel nexus to high risk country within 14 days and symptoms to CDC for consultation. Contact EMS for severely ill passengers or persons suspected of having COVID-19 (high fever, uncontrollable coughing, difficulty breathing, etc.). Provide surgical masks to symptomatic passengers. Wear disposable nitrile gloves. Officer wears N95 respirator, goggles/face shield, and disposable outer garments to prevent uniform contamination.

		5. U.S. Border Patrol Operations
		Line Watch, Transport, Processing, Detention, and Check Points
	Medium	<p>Primary</p> <p>Interdiction/processing of persons, vehicles or cargo.</p> <p>(Persons, drivers, passengers, or stowaways with travel nexus to high risk country within 14 days)</p>
	High	<p>Secondary</p> <p>Interdiction/processing of persons, vehicles or Cargo (Persons, driver, passengers, or stowaways with travel nexus to high risk country within 14 days)</p>

7. U.S. Border Patrol Operations	<p>Being in an enclosed room/space where symptomatic person with suspected COVID-19 is being held or evaluated by CDC, or transporting a person with suspected COVID-19</p> <p>Note: Suspected COVID-19 cases refers to those that are symptomatic, from a high risk country and have not been lab confirmed or tested yet. This does NOT apply to persons who are from high risk countries and displaying NO symptoms or to contacts of cases of NOT lab confirmed.</p>	<p>Very High</p> <p>Extended Close Contact (<u>less than 6 feet</u>) with symptomatic persons or those suspected of having COVID-19</p> <ul style="list-style-type: none"> • Persons with potential COVID-19 Symptoms, or • Who may have a travel nexus to a high risk country within the past 14 days, or • Otherwise high risk for or suspected of COVID-19 • Use <u>CBP Guidance for Leadership, Medical Officers, and Supervisors</u> to determine if exposure should be entered in the <u>CBP COVID-19 Incident Tracker</u>. <p>8. Air & Marine Operations</p> <p>Air Branches/Stations/and All AMO Facilities and Operations</p> <p>Note: When apprehensions or personal contacts result in Close Personal Contact (Less than 6 Feet) the following guidance applies.</p> <ul style="list-style-type: none"> • Persons with potential COVID-19 Symptoms, or • Who may have a travel nexus to a high risk country within the past 14 days, or • Otherwise high risk for or suspected of COVID-19
----------------------------------	---	---

<p>9. Disinfection and Cleanup of Contaminated Surfaces – General Guidance</p>	<p>Low</p> <p>Risk of exposure expected to be low during routine disinfection and cleaning of COVID-19</p> <p>Where known COVID-19 cases have recently been within the past few hours up to a maximum of seven days. Virus viability on surfaces past seven days is highly unlikely and should be factored into facility cleaning decisions.</p>	<ul style="list-style-type: none"> COVID-19 can live for prolonged periods (from a few hours up to a maximum of seven days depending on conditions, temp, etc.) of time on hard surfaces, door knobs, handrails, light switches, and other frequently touched surfaces. Frequent cleaning and disinfection should be performed when working with potentially infected populations. Surface disinfection should be performed after interaction with a suspected sick individual as well as periodically through a work shift. Refer to GSA Cleaning and Disinfection Procedures. There are everyday products as Clorox® and Lysol® wipes, sprays, and bottles (for large clean-up jobs) that are recommended and effective against COVID-19. These cleaning and disinfection products are effective for CBP workplaces and around the home and are readily available. If apprehension was made and individual was symptomatic, Officers/Agents duty gear and equipment should be disinfected in accordance with CDC guidelines for Law Enforcement personnel see Page 9. (Follow Agency Specific Policy for Firearms). Always follow manufacturers' cleaning and disinfection guidance and use prescribed PPE for disinfectants being used, especially where COVID-19 is known or suspected to have been present with the past seven days. For a complete list of Environmental Protection Agency (EPA) Registered COVID-19 cleaners and disinfectants check the EPA list of COVID-19 Cleaning and Disinfection Products at https://www.epa.gov/sites/production/files/2020-03/documents/sars-cov-2-list_03-03-2020.pdf. Wear an N95 respirator if cleaning and disinfection an area where COVID-19 was known to be present or suspected.
<p>10. Cleaning and Disinfection of CBP Facilities to Include POEs, USBP Stations and Check Points, Holding and Detention Areas</p>	<p>High</p> <p>Potential exposure to COVID-19 contaminated areas in general.</p> <p>Where known COVID-19 cases have recently been within the past few hours up to a maximum of seven days. Virus viability on surfaces past seven days is highly unlikely and should be factored into facility cleaning decisions.</p>	<ul style="list-style-type: none"> COVID-19 can live for prolonged periods (from hours to a couple days depending on conditions, temp, etc.) of time on hard surfaces, door knobs, handrails, light switches, and other frequently touched surfaces. Frequent cleaning and disinfection should be performed when working with potentially infected populations. Surface disinfection should be performed after interaction with a suspected sick individual as well as periodically through a work shift. Refer to GSA Cleaning and Disinfection Procedures. There are products such as Clorox® and Lysol® wipes, sprays, and bottles (for large clean-up jobs) that are recommended and effective against COVID-19. These cleaning and disinfection products are effective for CBP workplaces and around the home and are readily available. Always follow manufacturers' cleaning and disinfection guidance and use prescribed PPE for large jobs, especially where COVID-19 is known to have been present. For a complete list of EPA Registered COVID-19 cleaners and disinfectants check the EPA list of COVID-19 Cleaning and Disinfection Products at https://www.epa.gov/sites/production/files/2020-03/documents/sars-cov-2-list_03-03-2020.pdf. Wear an N95 respirator if cleaning and disinfection an area where COVID-19 was known to be present or suspected.

			<ul style="list-style-type: none"> • Wear non-vented goggles or face shield to cover face and eyes. • Wear a liquid impermeable gown (for large cleanup jobs) wear liquid impermeable suit/coveralls. • Dispose of all infectious material as biohazardous waste in accordance with local, state, and federal guidelines.
11. Cleaning and Disinfection of Vessels and Ships	Medium	Potential exposure to COVID-19 contaminated areas in general.	<p>Note: Cruise ships have higher incidence of exposure and risk levels may go up.</p> <ul style="list-style-type: none"> • COVID-19 can live for prolonged periods (from hours to a couple days depending on conditions, temp, etc.) of time on hard surfaces, door knobs, handrails, light switches, and other frequently touched surfaces. Frequent cleaning and disinfection should be performed when working with potentially infected populations. Surface disinfection should be performed after interaction with a suspected sick individual as well as periodically through a work shift. • There are products such as Clorox® and Lysol® wipes, sprays, and bottles (for large clean-up jobs) that are recommended and effective against COVID-19. • These cleaning and disinfection products are effective for CBP workplaces and around the home and are readily available. • Always follow manufacturers' cleaning and disinfection guidance and use prescribed PPE for large jobs, especially where COVID-19 is known to have been present. • For a complete list of EPA Registered COVID-19 cleaners and disinfectants check the EPA list of COVID-19 Cleaning and Disinfection Products at: https://www.epa.gov/sites/production/files/2020-03/documents/sars-cov-2-list_03-03-2020.pdf • Follow general precautions outlined above for general areas. • Wear nitrile or fluid impermeable gloves while cleaning and follow all manufacturers' guidelines for cleaning products.
12. Cleaning and Disinfection of Kojak Fingerprint Kiosks	Low	Low Risk of Exposure Due to Persons Who May Have Used Kojak or Crossmatch (finger) scanners.	<ul style="list-style-type: none"> • General cleaning and disinfection of these areas MUST be done in accordance with manufacturers recommendations in order to avoid damage to equipment. • Specific guidance for cleaning and disinfection of Kojak Fingerprint Kiosks can be found at https://cbpgov.sharepoint.com/sites/oit/pspo/training/catalog/kojak.aspx • The use of alcohol based hand sanitizers or wipes will BURN the platen and void the manufacturer's warranty. • General cleaning and disinfection of these areas MUST be done in accordance with manufacturers recommendations in order to avoid damage to equipment. • The use of alcohol based hand sanitizers or wipes will BURN the Platen and void the manufacturer's warranty. • Only use the following moisturizers with the Kojak/Crossmatch Fingerprint Stations: Nivea® Soft Moisturizing Cream, Aveeno® Daily Moisturizing Lotion and Gold Bond® Ultimate Healing Hand Cream.

Notes:

1. This JHA and PPE Assessment only applies to CBP operations related to exposure to 2019 Novel Coronavirus or COVID-19). At the time of developing this JHA, new cases are being reported in countries around the globe, including the United States. See below links to CDC, DHS, OSHA, WHO, and other reliable COVID-19 resources and information.

2.

CBP Respiratory Protection. All CBP Frontline Personnel, Officers, and Agents who may be in work situations that place them at increased risk of exposure to COVID-19, due to processing passengers or travelers with a nexus to COVID-19 affected countries, and may have to wear an N95 respirator as outlined in the above risk-based scenarios are considered to be in “mandatory use” N95 Respirator Programs. The mandatory use of an N95 respirator requires a medical clearance, fit testing, and have a clean shaven face, with no facial hair between the mask seal and the face, in accordance with OSHA 1910.134 and CBP HB 5200-08B policies. Frontline and uniformed personnel have had these programs in place for years due to other work situations that also require an N95, such as exposure to TB, handling of Fentanyl and other narcotics, Ebola response, Pandemic and PEID Response Plans, and now COVID-19.

3. **Voluntary Use of N95 Respirators.** The voluntary use of N95 respirators or surgical masks is allowed by employers when there is no work task that makes

the N95 use “mandatory.” In situations such as allowing mission support, administrative, or headquarters personnel that do not typically wear a mask, who would like to wear one for protection to exposures that are not related to specific work tasks, such as traveling to and from work, in congregate settings such as large metropolitan transit systems, buses, etc., use of a **surgical mask** would be considered “Voluntary Use.” In these cases, “Voluntary Use” of surgical masks may be allowed to meet the requirement of CDC recommendations for “Face Coverings” in social settings outside of work to protect others, since surgical masks are not designed to protect the wearer, they are designed to protect others (see CDC “Face Covering” Reference below for more guidance). Such use requires approval from a supervisor to ensure the use will not create a hazard for the employee, impact PPE supplies needed for critical front line “Mandatory Use” situations, or cause undue confusion and conflicting policy guidance, such as “Voluntary Use” of N95 respirators by front line officers in primary passenger processing areas when they aren’t performing any work that requires “Mandatory Use” as outlined above. All Respiratory Protection Programs, whether “Mandatory Use” or “Voluntary Use,” situations will be run in accordance with OSHA 1910.134 standards and policies outlined in CBP Handbook 5200-08B, Chapter 26. The use N95 respirator should be reserved for those front line personnel and high risk work situations for which they were intended.

While COVID-19 is a respiratory disease, the use of N95 respirators is one component in preventing the transmission of COVID 19. Other PPE may be needed under certain conditions and in some work environments as outlined in this JHA. The use of N95 respirators and masks is NOT the most effective or primary way of preventing disease transmission. All personnel should take these basic steps to prevent exposure to and transmitting COVID-19 (1) Practice good hygiene; (2) Washing hands frequently; (3) Covering your cough or sneeze; (4) Stay away from work if you are ill and contact your health provider for guidance; (5) Avoiding unnecessary congregate settings where COVID-19 exposure is more probable; (6) Follow CDC and Agency guidance for the use of “face coverings”; and (7) avoid touching your face.. Follow state/local/national social-distancing guidance off-duty and at home. The use of N95 respirators should be limited to front line personnel and those high risk work situations. These basic preventative measures will greatly reduce the exposure potential for ALL personnel and slow the spread of communicable diseases.

USBP COVID-19 REPORTING - 04/22/2020

USBP continues to assess all aliens encountered for potential risks by reviewing travel history and conducting intake interviews for potential medical conditions of concern utilizing organic resources, imbedded medical contract professionals, collaboration with the CDC, and local/state medical authorities.

Current CBP guidance: *Guidance to USBP Sectors on Novel Coronavirus dated March 14, 2020 and the CBP Job Hazard Analysis and PPE Assessment dated April 16, 2020.*

USBP COVID-19 RELATED APPREHENSIONS BETWEEN THE US PORTS OF ENTRY - See attached file for full reporting by sector and station

USBP reports ZERO apprehended aliens who have tested POSITIVE to COVID-19.

Apprehensions and Referrals Related to Proclamation as of February 2, 2020

USBP reports 92 Chinese Nationals APPREHENDED since the date of the Proclamation, February 2, 2020

USBP reports ZERO Iranian Nationals APPREHENDED since the date of the Amended Proclamation, February 29, 2020

USBP reports 6 Europe / Schengen Nationals APPREHENDED since the date of the Amended Proclamation, March 11, 2020

USBP reports 1 Irish / U.K. Nationals APPREHENDED since the date of the Amended Proclamation, March 14, 2020

CDC Referrals:

USBP referred ZERO persons to CDC for evaluation over the last 24-hour period.

USBP reports 109 persons have been REFERRED TO CDC since the date of the Proclamation, February 2, 2020

USBP continues to collect data and information pertaining to the health, welfare, and safety of all USBP personnel. Current statistics as of Wednesday, 4/22/2020 at 2400 hours, are as follows:
