U.S. BORDER PATROL
Positive COVID-19 Alien in Custody – XXXX Sector
Date

TALKING POINTS

- *1-2 bullet talking points for Leadership – these should be B1 and C1 level bullets bound for media and or the Department*

ISSUE

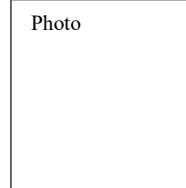

A synopsis of the event.

BACKGROUND

A complete narrative of the event. Be sure to include the following in narrative form:

Biographical:

- Name
- DOB
- COC
- Demographic

Subject Name

Apprehension Info:

- Event #
- A# and FIN # (if applicable)
- Immigration/Criminal histories
- SIR#
- Manner of Apprehension
 - Linewatch, checkpoint, smuggling load
 - If manner results in additional risk of exposure to others explain
- Was PPE worn by employees (including LSGS) and/or aliens at time of apprehension/transportation/detention?
- Transportation
 - Was dedicated transportation vehicle used?
 - Was vehicle decontaminated?
 - If travelling with a group was group transported together or separately?
- Were there signs of illness in the field?
- Was alien transported directly to medical or to detention?
- Was the alien medically assessed by LSGS?
- How long was alien detained at station/CPC?
- Was the alien isolated in detention? At what point?
- Verify TEDS at risk population checks are being conducted – 15 minutes welfare checks
- Disposition
 - ERO contacted for ToT?
 - When was/is ERO accepting custody?
 - What facility were they transferred to?

Medical:

- Positive Testing

U.S. BORDER PATROL
Positive COVID-19 Alien in Custody – XXXX Sector
Date

- Date/Time/location of testing
- Type of test conducted (blood/Swab)
- Date/Time of result
- What led to testing – temperature, visible symptoms, referral by LSGS, etc
- Dr./CDC orders
- Verify USBP HQ EOC was contacted
- Verify (b)(6)&(b)(7)(C) was contacted
- Verify CDC contacted
- Hospitalized?
 - Extent, prognosis?
 - When released/anticipated release?

TRAVEL HISTORY

- Detailed description of the route subject took before entering the United States.

Processing: Please email all inquiries to the (b) (7)(E) mailbox.

- (b) (7)(E) info from search and enroll
- Alien travel history
 - Interview should provide as much detail as possible on travel routes/arrangements
 - Contact (b) (7)(E) to request travel history
 - FINS (this takes out any confusion with names/dobs given along the way and gets (b) (7)(E) started quicker)
 - Passport Number (if available). If they actually have a PP (rare) that should be included.

POTENTIAL CO-TRAVELERS:

- List and describe any possible known co-travelers from the beginning of the trip, until the subject crossed into the United States.
- Was the subject apprehended as part of a group? If so, include name, date of birth, country of citizenship and processing disposition of each subject in the group.

U.S. BORDER PATROL AGENTS AND CONTRACT EMPLOYEES:

- Location of agents, employees, and contractors that were exposed to the COVID-19 positive subject. Has everyone been notified? What is the risk level (low, medium, high), as identified in the latest national guidance, of the exposed persons? What instructions were given? Describe any symptoms of those exposed.

• Arrest Agents: (Date/Time:)

- Name (pending notification or notified), CA 1 (pending or completed)

• Agents who assisted with arrest:

- Name (pending notification or notified), CA 1 (pending or completed)

• Transport agents:

U.S. BORDER PATROL
Positive COVID-19 Alien in Custody – XXXX Sector
Date

- Name (pending notification or notified), CA 1 (pending or completed). Include description of transport (from, to).
- **Contact Tracing:**
 - Sectors will complete an I2 or similar chart (example page 4) visually depicting all potentially exposed individuals

INTERNAL NOTIFICATIONS:

- Date and manner when the Union was notified. Detail their response, specifically and challenges or concerns and how they are being mitigated.

EXTERNAL NOTIFICATIONS:

- Any media interest. Which notifications have been made or are planned, in order of precedence.

FOB:

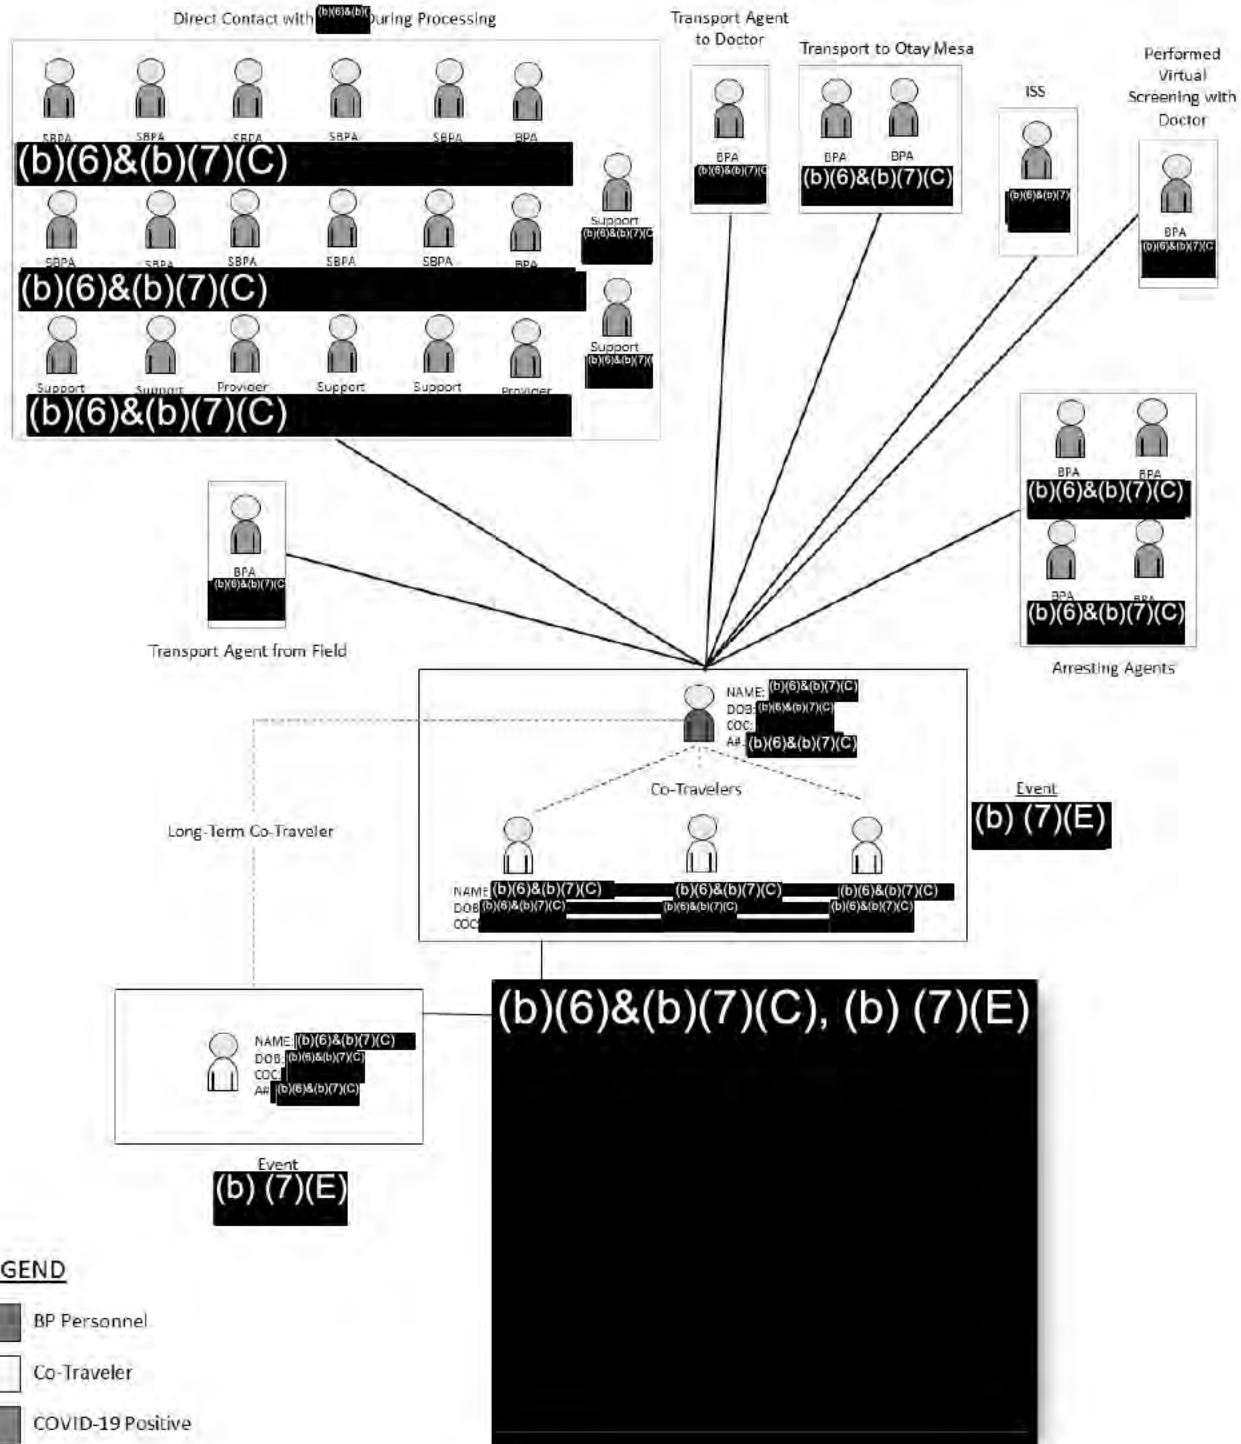

- FOB notify INM
- Did INM provide any feedback?
- Country of Nationality contacted if alien arrived within 14 days of travel

For HQ:

- CBP OPA
- USBP Strat Comm
- CBP OCA
- CBP INA
- Confirm tear sheet for C1 to Country's Ambassador
- Confirm tear sheet for U.S. Embassy – Mexico
- CBP OFAM
- CBP OSH

Date

CONTACT TRACING: (example)

U.S. BORDER PATROL
Positive COVID-19 Alien in Custody – XXXX Sector
Date

The following questions are not all inclusive, but should be used to complete both the IP and initial incident reporting to HQ:

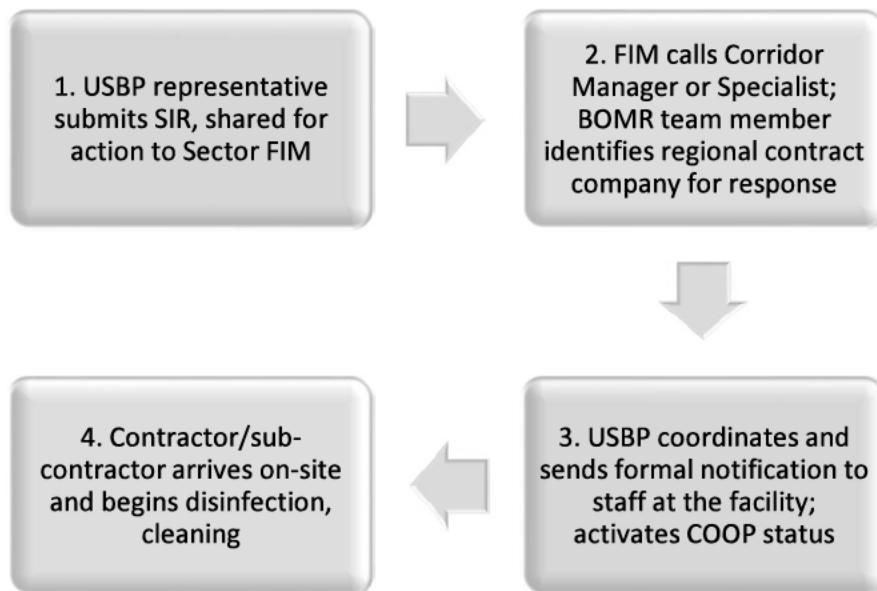

- 1) Did the subject contract COVID-19 while in USBP custody, or before apprehension?
- 2) Were there any other detainees in contact with the subject and what is their risk level?
- 3) What symptoms is the subject currently displaying?
- 4) What actions have been taken to isolate the subject?
- 5) Where is the subject being held, and what amenities are being provided?
- 6) What advanced medical protocols are being used while this subject is in custody?
- 7) Has ICE been contacted to accept transfer of the subject?
- 8) How many USBP personnel and contractors have been exposed to the subject, and what is their risk level?
- 9) Have exposed personnel been notified and what action, if any, have they been instructed to take?
- 10) Have all station personnel been advised of the situation? How many personnel were advised and what is their work status?
- 11) What is being done to disinfect/sanitize exposed vehicles and facility spaces?

Procedures for Responsive Facilities Cleaning – COVID-19

Criteria: An individual (CBP federal or contractor employee OR a detainee) who works in or is being detained within a CBP-owned facility has a suspected or confirmed case of COVID-19.

Official BPAM PMO Procedure:

1. A suspected COVID-19 case is identified and communicated by the US Border Patrol (USBP) or Air and Marine via a Significant Incident Report (SIR). The SIR is shared with the sector FIM.
2. The Sector FIM alerts the Corridor Manager (CM) or Corridor Specialist (CS)¹ to the suspected case and facility need for cleaning and disinfection. The CM/CS will use existing regional contract to identify and contact a contractor.
3. Sector USBP will coordinate and send formal notification to the USBP facility personnel and activate the COOP status for all personnel and operations. The Sector BPAM FIM will send formal notification of the facility status to the local BPAM maintenance staff.
4. The BPAM BOMR contractor/sub-contractor will arrive on-site and fulfill the cleaning requirement.

(b)(6)&(b)(7)(C) Branch Chief, will serve as the on-call back-up for all CM/CS personnel.

Questions and Answers

Q: What is the estimated response time from when a FIM declares the need for cleaning and when the regional contractor arrives onsite?

A: In the past, many BOMR regional contractors have been able to respond on site within a couple of hours. All of the BOMR staff is on call at this time, and will coordinate services from regional contractors ASAP.

Q: Is the area scope of cleaning already established in the regional contracts? Will the contractor only clean certain areas, or entire facilities?

A: The contract cleaning crew deployed to your site will clean any area you direct them to.

Q: If a detention space must be cleaned and sanitized, where will detainees be moved during the process? Will that space also need to be cleaned?

A: Secondary quarantine solutions are still being determined by FM&E and USBP. More information is forthcoming.

Q: What is the process for cleaning GSA leased facilities where there is a suspected case exposure? Will BPAM provide that cleaning, or will GSA?

A: More information is forthcoming ^{(b)(6)&(b)(7)(C)} will coordinate with GSA and communicate the process for leased facilities as soon as the process has been determined.

Q: Do regional contractors already have standardized procedures for sanitization? Is there a federal standard they are adhering to, or a standard that needs to be communicated when they arrive?

A: The regional contractors are established as experts in the Scope of Work. Each contractor is aware of OSHA, CDC and EPA cleaning standards and will utilize those standards while the cleaning work is performed.

Q: Does BPAM PMO need to specify which chemicals may be used during the cleaning/sanitization process?

A: The SOW refers to the FDA's list of key disinfection products. The regional contractors arrive on site with those products.

Q: How can we demonstrate the facility has been cleaned sufficiently if a customer asks?

A: BPAM PMO is currently developing a process for documenting that a space is deemed safe for reoccupation. More information is forthcoming.

Q: Is BPAM PMO obligated to provide cleaning services for fleet vehicles that had suspected case exposure?

A: BPAM PMO is not cleaning fleet vehicles.

Q: Is BPAM PMO providing any maintenance support for isolation centers? Is there elevated health concern for BPAM employees working in such a facility?

A: BPAM is currently working with USBP to get more information about facilities they have deemed "isolation areas," as we currently do not have such facilities in our inventory. More information is forthcoming.

Q: If there is a challenge with using an existing BOMR regional contract for cleaning, are there other acquisition options?

A: In such a case, the Basic Ordering Agreement (BOA) option may be used to acquire cleaning services in an exposed area. Please contact your Division Director and (b)(6)&(b)(7)(C) to discuss this option.

Q: My customers are requesting special accommodations, like extra hand sanitizing stations and air quality tests. Is BPAM obligated to fulfill these requests?

A: USBP headquarters has communicated that as long as BPAM fulfills the obligation of providing contractual cleaning in the event of suspected case exposure, USBP is on the hook for providing safety precautions like hand sanitizing stations. Air quality test requests should be fulfilled on a case-by-case basis.

Q: Will FM&E/BPAM receive any of the \$8.3B Emergency Spending for COVID-19 response activities?

A: At this time, we know the bill funding will be dispersed directly to FEMA; at this time we do not have details on disbursement from FEMA to other agencies. As of March 12, BPAM leadership has been informed that CBP has begun planning to build approximately 9 Quarantine Spaces within the US. We do not yet have information about the facility types, specific locations or expected timing.

Q: Will the funding ceilings for regional contracts be raised this option year due to COVID-19?

A: In most cases yes. Please contact (b)(6)&(b)(7)(C) to discuss your specific Sector's regional contract funding.

**U.S. Customs and
Border Protection**

HQBOR 50/1.1

(b)(6)&(b)(7)(C)

MEMORANDUM FOR: All Chief Patrol Agents
All Directorate Chiefs
(b)(6)&(b)(7)(C)
FROM: (b)(6)&(b)(7)(C)

U.S Border Patrol

SUBJECT: 42 U.S. Code Title 42 – The Public Health and Welfare

U.S. Customs and Border Protection (CBP), and specifically the United States Border Patrol (USBP), are supporting the U.S. Government's response to the COVID-19 virus.

Effective March 21, 2020 at 0001 hrs EST, USBP will exercise authorities derived under U.S. Code Title 42, Section 265, "...suspension of entries and imports from designated places to prevent spread of communicable diseases..." as laid out in the attached Operation Order Capio. The Director of the Centers for Disease Control and Prevention (CDC), under the Authority of the Public Health Service Act, has directed CBP to prohibit the introduction of certain persons into the United States who, due to the existence of COVID-19 in countries or places from which persons are traveling, create a serious danger of the introduction of such disease into the United States.

While operating under this authority, USBP will use Title 42 authority to immediately expel any individual encountered attempting to enter the United States in violation of travel restrictions. USBP will only apply Titles 8 and 19 authorities to subjects who are not amenable to expulsion under Title 42, or would otherwise be considered a high risk for the population (e.g., aggravated felons, relations to terrorism, agent assaults, etc.). Watch commander approval is required for any authority used outside of Title 42 during this timeframe. During this time, Border Patrol Agents will rely on their training and experience in detecting, apprehending and determining whether persons are subject to the CDC order, including but not limited to the following considerations: physical observation, use of sensors and technology, physical indicators and tracking techniques, information from third-parties, and deductive techniques.

The threat of COVID-19 continues to increase globally at an unprecedented rate. As part of the whole of government response to the pandemic crisis, the USBP's role in preventing the virus from spreading further into the United States is critical.

~~**WARNING. This document is FOR OFFICIAL USE ONLY / LAW ENFORCEMENT SENSITIVE
(FOUO/LES). It is to be controlled, stored, handled, transmitted, distributed, and disposed of in
accordance with DHS policy relating to FOUO/LES information. This information shall not be
distributed beyond the original addressees without prior authorization of the originator.**~~

USBP's primary focus now, as always, remains the protection of our nation and our workforce. Our objective for the duration of the operation will be to expel subjects who are encountered upon entering the United States illegally in an expeditious manner to minimize exposure to agents in the field, to subjects in our custody, and to the American public.

As a reminder, the sectors are to implement an operational risk management approach to minimize exposure. This includes dedicated field transport vehicles, transport agents, and processing agents where operationally feasible.

The USBP continues to explore solutions to the challenges associated with increased cross border activity, prolonged periods of custody, and expulsion of subjects to countries that are similarly fearful of potential COVID-19 infections.

USBP will closely monitor evolving situations related to the containment and spread of the virus as it pertains to national security and encountered populations along the United States borders.

Attached to this memorandum are guiding documents that will assist agents in their daily operations and making determinations as the threats present themselves. While we are not able to address every possible scenario, these documents lay the foundation to make decisions.

Any issue that prevents full implementation of the attached guidance must be raised to USBP HQ via the Emergency Operations Center at (b) (7)(E) within two hours.

With any questions or concerns related to the COVID-19 response efforts, contact the USBP COVID-19 taskforce at (b) (7)(E)

Donning Procedure

Special Instructions: The model W1400 filtering facepiece respirator was manufactured by Approval Holder Shanghai Gangkai Purifying Products Co., Ltd. (SGP) for Sperian Respiratory Protection, USA under TC-84A-4282.

Product Information:

Name: N95 filtering facepiece

Type: W1400

Protection: N95-Particulate Filter (95% filter efficiency level).

Fit test must be done for the user either qualitatively or quantitatively according to 29 CFR 1910.134.

Direction for fitting/donning:

1. Hold respirator in hand with nose clip at your fingertips and let the straps hang downwards below hand.

2. Place the respirator under the chin and its nose clip upwards. Pull the upper strap to the top back of your head and then pull the shorter lower strap to the back of neck, below the ears.

3. Push the nosepiece inwards with your fingertips to conform the shape of your nose.

4. Face fit check must be done each time the respirator is worn as follows:

- I. Cover the respirator with both hands, breathing sharply. If leakage along the nose bridge is detected, repeat step 3 and adjust the shape of clip to the nose bridge.
- II. If leakage is detected in the rest of respirator edge, adjust the straps again.
- III. If leakage cannot be eliminated, do not wear the respirator and stop going into the contaminated environment and turn to the supervisor for help.

Caution and limitation:

1. Not for use in atmospheres containing less than 19.5% oxygen
2. Not for use in atmospheres immediately dangerous to life or health.
3. Do not exceed maximum use concentrations established by regulatory standards.
4. Failure to properly use and maintain this product could result in injury or death.
5. All approved respirators shall be selected, fitted, used, and maintained in accordance with MSHA, OSHA and other applicable regulations.
6. Never substitute, modify, add, or omit parts.
7. Refer to users instructions, and/or maintenance manuals for information on use and maintenance of these respirators.

8. Always check the filtering facepiece and valve before use. Be sure:
 - 1) No damage or deformation
 - 2) No holes in the breathing zone
 - 3) No mildewed points or unusual smellOtherwise the products cannot be used anymore.

NIOSH Approval Number: 84A-4282

Manufacturer: Shanghai Gangkai Purifying Products Co., Ltd.

Stand: Aug. 2009

**U.S. Customs & Border Protection
Statement of Work (SOW)
For
Deep Clean and Disinfecting Services
XX Sector
XX April 2020**

Background:

This Statement of Work (SOW) is intended to support the facility services at U.S. Custom and Border Protection (CBP) sites. All service work shall be performed on CBP properties as specified by Building Entity (BE). Typical service work shall be performed within a 5 to 7 day week observed by the building occupants, unless changes are specifically approved by the Contracting Officer's Representative (COR) or Government Authorized Representative (GAR). This Statement of Work addresses all related concerns of deep clean and disinfection services for requested CBP facilities within the XX Sector Area of Responsibility (AOR).

1. Scope

The purpose of this effort is for the Contractor to provide deep clean and disinfection services at the requested facilities in the time of need within the XX Sector.

2. Applicable Documents: N/A

3. Tasks:

The Contractor shall perform deep cleaning and disinfection services at designated facilities upon request from the Contracting Officer's Representative (COR) or Government Authorized Representative (GAR) in the XX Sector. The Contractor shall comply with the following:

- Contractor shall follow approved infection prevention disinfection procedures as described by Centers for Disease Control (CDC).
- Contractor shall use EPA registered disinfectants with microbiocidal activity against pathogens and other bacteria and viruses; List N: Disinfectants for use against SARS-CoV-2.
- All cleaners and disinfectants shall be used in accordance with the manufacturer's recommendations.
- When cleaning and disinfecting, Contractor's employees shall don all OSHA required Personal Protective Equipment (PPE) set forth in 29 CFR 1910.
- The contractor performing this work shall be experienced in performing microbialrelated remediation or similar work (e.g., crime scene cleanup, mold abatement, etc.) . Contractor staff shall at minimum have current training in blood-borne pathogens, as defined by OSHA (29 C.F.R. 1910.1030).
- Contractor shall follow all infection prevention procedures for droplet precautions.
- Contractor shall properly dispose off-site all waste generated from the deep clean and disinfection services according to local, state and federal standards.
- Provide all labor and supervision to perform the requirements set forth in the Statement of Work (SOW).
- Coordinate all work with Facility Management & Engineering (FM&E) and Office of Border Patrol (OBP) operations.

4. Government Furnished Equipment:

There will be no Government Furnished Equipment (GFE) under this Purchase Order.

5. Place of Performance:

All work performed under this Task Order shall be performed at the following locations:

<<List Applicable Facilities>>

6. Period of Performance (Duration of Purchase Order)

The period of performance of this Purchase Order shall be for two (2) days from the date of Purchase Order award.

7. General Information:

7.1 Security:

The work conducted under this Purchase Order will be For Official Use Only (FOUO) with appropriate markings on all documents produced in support of this SOW.

7.2 Physical Security:

CBP personnel shall be responsible for safeguarding all Government equipment, information, and property provided for this installation. At the close of each work period, Government facilities, equipment, and materials shall be secured. All contractor personnel shall have passed a preliminary background check before being admitted to the facility. The Government reserves the right to deny access to anyone they feel has not been properly screened and approved for work at a Border Patrol facility or exhibits suspicious or undesirable behavior.

7.3 Points of Contact:

- Contracting Officer's Representative (COR) –
BPAM PMO, FM&E Office of Administration
U.S. Customs & Border Protection

- Contracting Officer –
U.S. Customs & Border Protection

8. Special Considerations: None

Below are the questions HQ initial needed back ASAP, the SIR, and attached is the Quad Sheet submitted to HQ.

- Clearly COVID-19 positive at entry
 - Did not catch while in CBP custody
 - Correct. Subject was apprehended at 0555 on 4/23. Upon medical evaluation prior to being booked into the ELC CPC, subject exhibited a temperature of 99.5 @ 0845.
 - Our actions to isolate
 - Subject never entered ELC CPC. Subject was evaluated by Loyal Source personnel in the Sally Port of ELC CPC and immediately transported to CAX for further monitoring.
 - Subject was evaluated by (b)(6)&(b)(7)(C) Calexico, California, via webcam on 4/23/20 @ 1030.
 - (b)(6)&(b)(7)(C) recommended to isolate and monitor for 48 hours. Did not suspect COVID-19.
 - Subject isolated in cell by himself at CAX.
 - Challenges with local medical – they will not house so subject must be held at CBP processing facility
 - Subject was not exhibiting severe enough symptoms to justify hospitalization
 - Our actions to contact trace and notify
 - (b) (7)(E) alerts have been placed on three (b)(6)&(b)(7)(C) nationals who were apprehended with (b)(6)&(b)(7)(C) and returned to (b)(6)&(b)(7)(C) via T-42 through CAL POE.
 - Notify international partners?
 - ELC FOB is notifying (b)(6)&(b)(7)(C)
 - **Contact tracing:**
 - Our Personnel – notify
 - ELC is working on notifying all employees who may have been in contact with (b)(6)&(b)(7)(C)
ISS Action has been notified regarding transport officer who was in contact.
 - Determine appropriate work category consistent with latest guidance
 - Category should be low to medium risk of exposure due to proper PPE being utilized.
 - Aliens – identify
 - (b)(6) subjects have been identified and (b) (7)(E) alerts placed.
 - These (b)(6) subjects were processed under Title 42

- ELC FOB is working to notify [REDACTED] (b)(6)&(b)(7)(C)
- Notify - (b)(6)&(b)(7)(C) if returned to [REDACTED] (b)(6)&(b)(7)(C)
 - ERO?
 - ERO has not been notified. Detainee has had no known contact with any detainees going to ERO
 - Other Nation?
 - ELC FOB is working to notify [REDACTED] (b)(6)&(b)(7)(C)
- Where are we holding this person?

Subject is being held at Calexico Station, isolated in cell by himself.
- Why are we not using the tents?

Instructions regarding tents were for use for Delayed Title 42 use. [REDACTED] (b)(6)&(b)(7)(C) nationals are processed as Title 8 and TOT'd to ERO.
FM&E has not yet installed dividers inside tent to separate detainees from the edges of the tents and the AC units
- Enhanced medical protocols while in custody? (detailed)
 - ELC is screening 100% of subjects prior to entering facility.
 - Any subjects with high temperatures or other symptoms are isolated and transported to Calexico Station to be monitored
 - If Loyal Source deems further medical care is needed, the subject is transported to the local hospital or medical provider
- Protocols for BP personnel monitoring – do we have same team on every shift? Minimize exposure?
 - Employees are made aware of any positive test results and instructed to self-monitor if there is a low risk of exposure.
 - ELC will work to minimize risk of exposure as much as possible.

WCX Transportation SOP

- To accommodate transportation of detainees from the field to the Willcox Station (WCX), one transport van will be stationed at each WCX-operated checkpoint, and two transport vans will be stationed at WCX. Transportation/Processing agents will obtain a transport van from the checkpoint closest to the apprehension location.

Each transport van will be stocked with the following PPE:

- **3 Tyvek Coveralls**
- **50 N-95/Surgical Masks**
- **100 Examination Gloves (Blue Nitrile or similar style)**
- **1 pump sprayer containing a 10:1 bleach solution (sprayer is on order and will catch up to the van upon arrival)**

Additional pump sprayers containing a 10:1 bleach solution will be stationed in the WCX Sally Port.

- At arrest and prior to transport, agents will instruct all apprehended individuals to wear surgical masks.
- Prior to transport, agents will assess individuals for signs/symptoms consistent with the flu/coronavirus (COVID-19).
 - If any COVID-19 signs/symptoms associated are noted, the presenting individual(s) will be:
 - Questioned to determine the likelihood of being infected with COVID-19: individuals from China, having a history of travel to/through/from an **at risk country** within the last 14 days or that were exposed to individuals known to be infected with COVID-19.
 - If any individual is symptomatic and determined likely to be infected, that individual will be separated from other individuals and transported directly to the Northern Cochise Community Hospital or another medical facility for medical screening. **Any individual determined likely to be infected with COVID-19 will not enter a BP facility. Upon release from a medical facility, agents will contact the TOC SBPA for further guidance relating to any individual having tested positive for COVID-19 or pending a COVID-19 test result.**
 - Any individuals apprehended in same group as an individual deemed likely to be infected with COVID-19 will be transported to a BP facility for processing. All asymptomatic individuals from the same event will detained separate from individuals unrelated to the event.

****PPE has been supplied to agents for donning at their discretion****

- Two additional transportation vans containing the aforementioned PPE will staged at the WCX. When a transportation van returns to WCX, the van will be sanitized using a 10:1 bleach solution prior to being returned to service. The next shift will drive a sanitized transport van to a checkpoint, ensuring all three vans are appropriately staged.
